If it's ok with you Dan can cover this call.

Last year we did 13 emergency responses and another 10 cleanups, about half of which we directed and the other half we completed with Gov't resources, our staff and contractors.

So far this year we have done 12 emergencies – Maywood is one of 3 evacuation cases but others have included voluntary temporary lodging for residents.

We cover typical chemical industry wastes but also explosives, mining wastes, pesticides, mercury poisonings, and radioactive wastes. Occasionally we respond to fires and or facilities that have recently been destroyed by fires.

Hi Dan and Harry,

The reporter has a follow up question: **What does it mean when the US EPA says a property is under control of the US EPA Superfund Response Team?**

I asked him where he got this information from and said that he saw that this property is under that classification now after the Fruitland Magnesium Fire from court documents.

He then said that he just wants to get an idea of how common something like this is in CA?
What other times has one of these response teams from EPA been deployed?

Do we have a few figures as to how often we deploy to emergency responses? I was thinking we could tell him how many we deployed to an ER last year and so far in 2016.

Thanks,

Soledad

Soledad and Rusty – this is what we should send to NBCUniversal. Dan

EPA has stabilized the site so that contaminants will not migrate into the surrounding neighborhood. The site is fenced and has 24 hour security to prevent trespass and vandalism.

EPA has established a multi-agency coordination group, with state and local agencies, including the Los Angeles County Fire Department, the California Department of Toxics Substances Control and the California Department of Resources Recycling and Recovery, to develop a plan for addressing the site contamination with the least impact to the neighborhood and with the maximum potential for recycling usable material from the site. EPA's policy is 'enforcement first', which means that the parties responsible for the pollution and contamination should pay for its mitigation.

Hi Dan,

We got a press inquiry from NBC LA regarding Panda International. The reporter is working on an update story because the owner is supposed to appear in court on Thursday. He is touching base with all the agencies that were involved and wants to find out what the latest is from EPA's side: what are the next steps? What did EPA find?

I spoke with Jason and he summarized the main items below. I know you had a meeting with LA DPH a few weeks ago, so I wanted to touch base with you and see if you had anything to add/edit.

Hoping to get this to the reporter first thing tomorrow morning.

Thanks!

Soledad

Subject: RE: Panda International/Fruitland Magnesium Fire

Just spoke with Soledad.

Three main activities:

- EPA is pursuing enforcement first PRP-lead removal

- EPA is working with state/local partner agencies regarding authorities/resources to assist with removal activities

- EPA is planning for a fund-lead removal action which will require \$2 million statutory exemption approval from HQ (costs include ER activities to-date and planned facility

activities).

Currently the site is stabilized, fenced, and EPA has contracted 24 hr security.

I suggested that Soledad contact Dan Meer regarding his communication with Public Health to ensure coordination of media info.

Thank you,

Hi Harry,

Just spoke to the reporter and he is working on this story because the owner is supposed to appear in court on Thursday. He is touching base with all the agencies that were involved and wants to find out what the latest is from EPA's side: what are the next steps? What did EPA find?

He also wanted me to check in on the sampling result reports that we told him we would send him after Sept. 15th.

He is hoping to get someone on the phone today. Until what time are you in the office? I'm thinking Jason should also be on the call.

Let me know.

I'm on this communications training but can step out for a quick call.

Thanks,

Soledad Calvino

Hi Mr. Allen,

I'm writing about Panda International today for nbcla.com and wanted to pick your brain. You have a few minutes to talk today?

Thanks,

Jason
